

AYUSH YADAV

Full-Stack Software Engineer

📍 Bhopal, India | 📞 +91-8074360520 | ✉ iamayushyadav1107@gmail.com
🌐 PortFolio | 🔗 LinkedIn | 🐙 GitHub | ⚡ LeetCode

Summary

Computer Science (AI & ML) undergraduate and software engineering intern who ships web applications end to end, from typed React interfaces to secured REST APIs, relational schemas and containerized deployments, and who designs multi-agent LLM systems on LangGraph and the Model Context Protocol. Targeting full-stack software engineering roles.

Education

B.Tech, Computer Science & Engineering (AI & ML) | VIT Bhopal University | 2023 – 2027 | CGPA: 8.67 / 10
Kendriya Vidyalaya, Hyderabad | 2021 – 2023 | Class XII: 85% | Class X: 97.3%

Skills

Languages & Core CS: TypeScript, JavaScript, Python, C++, SQL, OOPS

Frontend: React, Next.js, React Router, Vite, Tailwind CSS, Zustand

Backend: Node.js, Express.js, FastAPI, Flask, Prisma, REST API Design

Databases: PostgreSQL, MySQL, MongoDB

Agentic AI: LangGraph, LangChain, Model Context Protocol (MCP), Multi-Agent Systems

DevOps & Tools: Docker, Git, GitHub Actions CI/CD, Vercel, Render, Pytest, Vitest

Experience

Software Engineer Intern

GitHub | Jul 2026 – Sep 2026

MP Online Limited, Bhopal, India

Stack: React, TypeScript, Flask, PostgreSQL, Docker

- Built **TaskForge**, a role-based workforce platform serving **34 REST endpoints across 7 permission roles**.
- Redesigned authorization around a central permission registry, eliminating a privilege-escalation flaw.
- Secured authentication with scrypt hashing, a 15-minute logout after 5 failed logins, CSRF tokens and CSP.
- Optimized the task list from **N+1 queries to a single aggregate** and removed a full-table dashboard scan.
- Automated testing and delivery with **116 tests** and a two-stage Docker build on GitHub Actions CI.

Projects

AeroCode: In-Browser AI Development Environment

GitHub | Live Demo | 2026

- Engineered a Next.js and React IDE where projects boot in **WebContainers**, so code never runs on a server.
- Integrated a Groq-powered assistant into the Monaco editor with inline completions and file-aware chat.
- Launched GitHub repository import and **6 framework starter templates** for one-click project creation.
- Implemented OAuth across 2 providers with deny-by-default middleware, persisting user state in MongoDB.

VoyaGen AI: Multi-Agent Travel Planning System

GitHub | Live Demo | 2026

- Architected a LangGraph system whose supervisor routes **5 specialist agents** per request at runtime.
- Connected **3 Model Context Protocol servers** across 2 transports with lazy loading and source fallback.
- Delivered human-in-the-loop review with PostgreSQL checkpointing so paused sessions survive restarts.
- Reduced off-domain requests to a single model call by adding an LLM relevance guardrail at the entry point.

ResuMetrics: AI Resume & ATS Analysis Platform

GitHub | Live Demo | 2026

- Developed a React Router and TypeScript app scoring resumes on **5 weighted criteria** with explained fixes.
- Designed a dual AI inference path validated by one shared schema, so the app runs without an API key.
- Protected user data by keeping API keys out of the browser and uploaded files off the server.
- Modeled each analysis as a retryable state machine and verified the logic with **29 automated tests**.

Awards & Certifications

- **National Finalist, HackWithInfy; Semi-Finalist, Flipkart GRiD 7.0:** Top-ranked in 2 national contests.
- **Amazon ML Summer School 2026:** Selected for Amazon's invite-only advanced machine learning program.
- **Dynamic Programming Camp, AlgoUniversity:** Chosen from **60,000+ applicants** for algorithm training.
- **Contributor, GirlScript Summer of Code 2026:** Shipped reviewed changes to live repositories over 3 months.
- **AWS Certified Solutions Architect – Associate:** Compute, storage, networking and security architecture.
- **GitHub Foundations** (Microsoft) and **Oracle AI Foundations Associate** (Oracle).
